

AUTOMATIC MIXING SYSTEM 65 litres

Rotary tub mixer with two motors and different mixing tools for a wide range of materials to be mixed. For small to medium-sized building sites.

Perfect for:

- levelling compounds,
- coating,
- mortars,
- adhesives

...if you want to keep your hands free...

Safety

The mixing tool is covered by a safety cover; a safety cut-out stops the mixer if it is opened.

Mixer drive

Powerful mixer motor for thorough mixing without lumps

Mixer:

Exchangeable mixing tools for liquid materials and soft mortars

Scraper:

To have a best homogeneity, the scraper bring back the mixing to the stir-mixer on the center of the bucket

Bucket transporter (in option)

Perfect to move the rubber tank at the end of the mixing and easy transportation where you like

Size of mixing tub:	65 litres
Capacity:	40 litres or 60 Kg
Power rating: mixer	1 KW
Power rating: rotary table	0,37 KW
Power supply	230 Volt
Speed: mixing tool	750 tr/min.
Speed: Rotary table	18 tr/mn.
Dimensions	600 x 820 x 870 mm
Weight	58 kg

Rubber tank

75 litres polyethylene rubber tank, easy transportation, very stable.

Mobile

Practical hinged handle for moving the machine, low weight for high mobility

Rotary plate

Rotary plate with its own motor, for an optimum mixing process and shorter mixing times.
