"BRONCO" STRIPPER

NEW

Bronco : The most efficient way to remove even the hardest floor coverings, including ceramic tiles. This propane powered machine uses 13 Kg propane tank. This machine has the best Weight / Speed ratio available on the market. With a zero turn radius and the mechanically actuated controls it is easier to maneuver in tight spaces, (no hydraulic servo controls). The Bronco's patented suspension system enables it to remove flooring at faster rates with less weight requirement. The smaller size and lighter weight also makes it practical for residential floor removal jobs.

PROPANE POWERED

« Bronco » can remove.....Efficiency / Output : these types of floors :

- PVC (tile, vinyl floors).....
 - Linoleum.....
 - Carpet.....
 - Sport Floor.....
- } from 200 to 300 m² / hour
